¹ Based on a competitive comparison of the HP Printer Driver and comparable competitive printer drivers that represent the majority of the market share as of 2024 according to IDC. HP Click Driver performs all steps in one: providing a real-print preview, PDF error detection with warnings, and print settings all together, unlike competitors, which are not integrated. The comparison was performed by Sogeti in July 2024.

² The last release supporting Windows 7 and 8 was in 2021. Experience varies based on printer model. Future support may vary. Refer to <https://www.hp.com/hp-click> for the most current information.

³ Generates a PDF of the original document as specified on the source application printing dialog settings, not reflecting any modifications made within our preview software. This functionality is only available on HP Click Driver.
